## INTRODUCTION

This brand style guide contains everything you need to create a thoroughly recognizable Dash document. It also offers our valued partners the necessary information to clearly and successfully market their brand in conjunction with ours.

These guidelines are meant to help us express Dash's core identity and values. Through the correct and consistent use of our visual system, you help to keep our Dash identity, style and brand strong and immediately recognizable.

The design of each one of your presentations, collateral and digital assets, is important. Every touchpoint bearing the Dash name and logo that people encounter influences and helps to create the overall perception of Dash.

By remaining consistent to our overall brand identity, we help to demonstrate to others we are all committed together, albeit perhaps in our own ways, to a unique, but unified core platform and vision.

Remember that these are only style guidelines and are provided to help you create beautiful documents. It's up to you and any collaborators to communicate the Dash brand in a focused, dynamic and positive way.

If you have a question about something you've produced and want us to take a look, please contact the communications and marketing department.

That's what we're here for.

It can also be used in very exceptional cases for special applications such as embroidery or engraving.

## DASH “D” ICON

The full Dash logo should be used by default to reinforce the brand name and help to build awareness.

While not to be used as a replacement for the logo, the distinctive Dash D can be used where appropriate to represent the brand along side other icons.

The Dash D icon can also be used with care as a brand design element.

If they are present on the same page, separate the logo and the icon so they act as counterpoints and not as a complete symbol.

Use the same color rules as the logo.
